Flow Products, Inc.™

Cerro — A Company Rich In Tradition.

COMPANY MISSION: Our focus and direction is to be the most market driven, customer-focused, low cost provider of high quality flow control products to the plumbing, heating, air conditioning, refrigeration and industrial markets.

1908 Founded as L.J. Cohen Co., dealers in scrap iron and other metals.

1927 Lewin Metals built its own electrolytic refinery in Sauget, Illinois.

1940s As the U.S. entered World War II, Lewin-Mathes made parts for projectiles, tube for cargo and combat ships and other war products.

1920

1920s Renamed Lewin Metals, the company experimented with electrolysis, the refining process to make purer grades of copper.

1939

LEWIN MATHES
SAINT LOUIS, MISSOURI

1939 After merging with the G. Mathes Co. to become Lewin-Mathes Co., the company built its first copper tube mill.

1957

1957 Lewin-Mathes Co. became part of Cerro de Pasco Corp., which financed construction of the present mill in Sauget, Illinois.

1962 State-of-the-art extrusion press begins new era in copper tube production.

1962

1981 Cerro opens Shelbina, Missouri plant for the production of precision, seamless thin-wall copper tube for the OEM industry.

1981

2001 Cerro opens mini-mill/distribution center in Cedar City, Utah, to bring tube production closer to our customers to ensure the best possible service and lowest delivered cost.

2001

1975

1975 Cerro Copper Products Co. becomes part of The Marmon Group of companies, an international association of more than 100 companies that operate independently within diverse business sectors.

1996

1996 One of the only continuous billet casting facilities in the U.S., Cerro Copper Casting opens in Mexico, Missouri. Later that year, Cerro adds plant in Bossier City, Louisiana.

2004

2004 Cerro Copper Products Co. and Cerro Copper Tube Co. consolidate under the name Cerro Flow Products, Inc. The new structure is designed to ensure that you receive industry-leading customer service, enhanced transaction efficiencies and new innovations in flow product solutions.

Since 1908, Cerro has continued its pioneering spirit. While we maintain our focus on a tradition of copper, we continue to expand into new flow product solutions to meet the needs of the markets we serve. We are proud to offer you a trusted brand and we look forward to providing you with the highest quality, competitively priced products and value-added services now and in the future.

We're Cerro Flow Products, Inc. – the trusted brand since 1908.

Customer Service Is Priority One.

At Cerro, superior service is our top priority. And that means meeting every one of your unique needs to help you grow in today's competitive global business environment.

Our customer service organization is designed to streamline your order process and keep it hassle-free. Our representatives actively manage your orders to provide on-time product shipping, delivery and invoicing. When you call, our integrated electronic transaction processes allow us to immediately access your account information, place a new order and track an existing order. If you have any technical questions, a representative will forward your call to our technical support team.

It is our goal to provide you with the most up-to-date product/technical information, and, develop new processes for increasing your operational efficiencies. To do this, we support e-business transactions through EDI processing, product bar coding, along with on-line order tracking and easy referencing of product applications and specifications. These services combine to speed your ordering transactions for greater time-savings and overall transaction cost reductions.

Our customer service team can assist you with any questions regarding your Cerro order. Your satisfaction is vital for our business. And Cerro is always here for you – providing you the best service experience possible.

Dedicated Field Representation

Cerro has been building relationships with our customers since 1908. We have an in-depth knowledge of what you want and need to be successful. It is our business to know your business. It is our job to provide you with flow product solutions. Our knowledgeable sales team is always on top of changing conditions and trends. They are your industry experts.

Today, more than ever, your professional Cerro sales representative is market-focused and trained to provide answers regarding our expanding product line, new services and any other questions you have. Each sales representative is assisted by our professional customer support team, which makes every order transaction fast and easy. With Cerro, you are just a phone call or email away from a flow product solution.

Trusted Since 1908.

Cerro prides itself on being a dependable supplier of superior flow products for the plumbing, HVAC/R and industrial markets. Our totally integrated systems provide the very best solution for the unique needs of the customers we support – wholesale distribution, retail and OEM manufacturers – both domestically and internationally.

Our organization is built to provide order accuracy, on-time delivery, high fill rates and product quality beyond industry standards. And with every new and existing product that bears the Cerro brand, you can rest assured that it will carry our 95-plus year tradition of value and trust.

Our current product line-up:

Plumbing

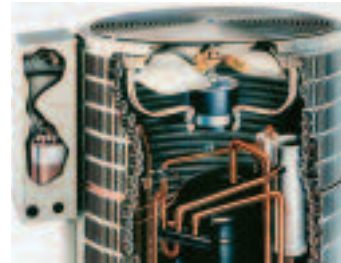

Cerro Copper Plumbing Tube — the original copper tube for plumbing, air conditioning and refrigeration applications in residential, commercial and institutional installations. We provide a complete range of sizes and types, engineered to exact specifications to meet the highest standards of performance.

Industrial

CerroSpec® — world-class seamless, thin wall copper tube manufactured to exacting tolerances. Its precision and ability to hold tighter dimensional specifications allow for improved performance characteristics and product yield. Plus, our SuperClean continuous I.D. and O.D. purge annealing furnace introduces a new level of cleanliness and superior quality while our innovative packaging solutions help reduce your costs.

CerroGroove® — our internally grooved copper tube. The precision of our tubing provides superior heat transfer capability. CerroGroove allows for a more efficient cooling unit while reducing both energy consumption and costly demands from the unit's other components. This enables air conditioning OEMs to lower their costs through the production of smaller, more efficient cooling units.

HVAC/Refrigeration

CerroSet® — CerroSet linesets are designed especially for the HVAC market. We offer over 1,000 different lineset combinations for quick, cost-efficient field installation of split systems air conditioners and heat pumps.

CerroPure® — our nitrogen pressurized ACR tube is specifically engineered and manufactured for applications in medical, refrigeration and other specialized equipment functions. CerroPure meets the highest industry standards and provides superior cleanliness for the contaminant-free transportation of refrigerants, oxygen and other gases.

Meeting Worldwide Market Requirements.

Our integrated supply chain ensures that no matter what type of flow product you require, Cerro will meet your requirements with dependable, on-time and on-site delivery. Cerro's state-of-the-art manufacturing facilities and distribution centers are located throughout the United States to quickly meet your exact flow product needs.

Distribution Centers

To ensure an expansive supply network and to support our factory direct shipping capabilities, Cerro maintains a network of regional distribution centers. The system allows us to have the right product at the right location to meet the unique product requirements of all of our customers.

Manufacturing Plants

Cerro maintains a network of strategically located manufacturing facilities. Each facility supports specific product lines, however, each plant can produce our complete range of products to meet your demands for assured supply and reliable delivery.

Sauget, Illinois – Cerro Flow Products, Inc. world headquarters. At this facility, Cerro produces a complete range of copper tube. Covering 61 acres, the Sauget operation is capable of producing over 200 million pounds of copper tube annually for the plumbing and HVAC/R markets including CerroPure nitrogen charged tube.

Cedar City, Utah – this highly advanced mini-mill facility features a proprietary manufacturing technology that ensures dimensionally consistent plumbing tube. The plant not only produces the highest quality copper tube, but also brings tube production closer to our customers to ensure the best service and lowest delivered cost.

Shelbina, Missouri – ISO 9001:2000 certified production

facility for CerroSpec and CerroGroove tube. The facility uses cold rolling pilger mills to create a consistent, seamless thin-wall copper tube manufactured to tight tolerances. In addition,

our SuperClean tube-annealing furnace sets the industry standard for clean and consistently tempered copper tube.

Bossier City, Louisiana – a production facility for refrigerant tube, level wound coil, short cut products and CerroSet linesets. Sophisticated manufacturing controls over the entire lineset manufacturing process from drawing the tube to packaging ensures a superior product with the necessary soft annealed temper for easy field installation.

Mexico, Missouri – one of the only North American plants able to continuously cast billets for the production of copper tube. This highly advanced, ISO 9001:2000 certified casting facility produces 99.99% pure copper billets for use in the manufacture of our plumbing and engineered tube.

The Cerro Advantage.

Our sole mission is to provide you with the highest quality flow control products, backed and delivered with these Cerro advantages and our promise to you:

- Unparalleled customer service and technical support before and after the sale.
- Continued investment in innovative processes for the assured delivery of precision flow products at the lowest possible cost.
- Complete range of product sizes and styles to fit every application.
- Increased use of technology to support your business operations, increase your efficiency, reduce your transaction costs, and improve your access to product/service information.
- Innovative packaging solutions to maintain product quality while reducing your shipping, storage and disposal costs.
- Expansive manufacturing and warehouse/distribution network to ensure high fill rates and on-time deliveries.
- World-class quality backed by internal quality assurance programs and a highly skilled technical support group.
- Respected brand backed by a strong, reliable company.

Always Moving Forward.
